

LO21::Expression

```
graph BT; LO21_Exp[LO21::Exp] --> LO21_Constante[LO21::Constante]; LO21_Constante --> LO21_Expression[LO21::Expression];
```

The diagram illustrates a three-level inheritance hierarchy. At the base is the class `LO21::Exp`. An arrow points from `LO21::Exp` to the intermediate class `LO21::Constante`. Another arrow points from `LO21::Constante` to the top-level class `LO21::Expression`. All three classes are represented by rectangular boxes with black borders.
